Profile

Hi! I am third year telecommunication student from Braşov, Romania. I love all aspects of computer science and telecom, but the ones that interest me the most are cybersecurity, and data science. But I also don't shy away from more user oriented topics such as frontend design.

I am always trying to learn new stuff, right now I am interested in learning more about automation and testing.

Education

2020 – present	Tehnologii şi Sisteme de Telecomunicaţii <i>Universitatea Transilvania din Brasov</i>	Brasov, Romania
2016 – 2020	Diploma de Bacalaureat <i>Colegiul "Emil Racovita"</i>	Brasov, Romania

Professional Experience

07/2023 – 09/2023	Science & Engineering Summer School 2023 - DevOps: Linux & Ansible <i>IBM</i>	Brasov, Romania
-------------------	---	-----------------

Skills

Python	Linux	Java	C/C++	Web Scraping	Automation	Octave/Matlab
Postman	API Testing	Networking	Ansible			

Languages

Romanian	● ● ● ● ●	English	● ● ● ● ● ●
----------	-----------	---------	-------------

Projects

Raspberry Pi QR Scanner

Designed and implemented a QR code scanner using a Raspberry Pi, which can detect malicious QR codes using Google's Safe browsing API to enhance security measures. This project was a part of my personal initiative to explore the applications of computer vision in the field of cybersecurity.

File Organizer

Python

Developed a Python script to organize files in a directory based on their file type. Using the os and shutil modules, the script moved files to subdirectories based on their extension. The project allowed me to enhance my Python programming skills and deepen my understanding of the file system.

Personal Web Scraping Projects

Interests

CTF competitions *(Brigham Young University CTF, ranked in the top 15%)*
